SEBI observed that the participation by the public non-institutional shareholders/retail shareholders is at a negligible level; and there are multiple e-voting service providers (ESPs) providing e-voting facility to listed entities in India. Demat account holders would be able to cast their vote without having to register again with the ESPs, thereby, not only facilitating seamless authentication but also enhancing ease and convenience of participating in e-voting process.

During the year, the Company has not accepted any fixed deposits under Chapter V of the Companies Act, 2013. The matter was transferred to the Hon'ble Supreme Court and in

its Order dated March 24, 2021, it has interalia directed:

"225.3. It is made clear that the IRP shall not entertain any expression of interest by any other person nor shall be required to issue any new information memorandum. The said resolution applicants shall be expected to proceed on the basis of the information memorandum already issued by IRP and shall also take into account the facts noticed and findings recorded in this judgment."

Accordingly, accepting any new claims received after December 6, 2019 would lead to updating of information memorandum which is clearly prohibited in terms of the above direction.

The CoC has approved the Final Resolution Plan read with its addendum submitted by Suraksha on June 23, 2021 and all claims received post December 6, 2019 have not been incorporated in the Committee of Creditors ("CoC") and are/ were forwarded to Suraksha.

CORPORATE GOVERNANCE REPORT

At Jaypee Infratech Ltd. (JIL), Corporate Governance is viewed as a commitment backed by a fundamental belief of maximizing its stakeholders' value, ensuring transparency and accountability in functioning, and stimulating mutual trust at the very core of its basic character. It is observed not as a discipline imposed by a Regulator, but, as a culture that guides the Board, Management and Employees to conduct business in a manner that exemplifies, enhances and sustains growth in its stakeholders' value and meet stakeholders' aspirations and societal expectations at all times.

We are committed to make continuous efforts to adopt and adhere to the best practices of Corporate Governance. Corporate Governance is an integral part of the way we do business, which is reinforced at all levels within the Company and emanates from our attempts to constantly improve sustainable value creation for our stakeholders. It stems from the dynamic culture and positive mindset of the organization and focuses on commitment to values and adherence to ethical business practices. Thus, timely, adequate and accurate disclosure of information on performance and ownership forms the cornerstones of Corporate Governance.

We believe that every Corporate Strategy needs to be dynamic, vibrant and responsive to the changing economic scenario and flexible enough to absorb environmental and fiscal fluctuations.

It must be capable of harnessing inherent strengths of available resources and materials and have the capacity to learn from success or failure and more importantly, ensure growth with human face. This has always been the guiding philosophy in the Company and will continue to be so in future, as we continue to perceive Corporate Governance as an upward moving target that we collectively strive towards achieving.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Macro Economic Environment:

Global Economy

The ongoing COVID-19 pandemic continues to impair the global economic recovery, as severe outbreaks, subsequent waves, and virulent strains weigh on the growth of many countries. However, unlike 2020, this year was marked with the much-awaited vaccine rollouts. Currently, 23 percent of the global population – 1.9 billion people, have received at least one dose of vaccine, and approximately half of them have been fully vaccinated. After enduring a pandemic-led economic downturn for much of 2020, green shoots of recovery began to emerge across Asia Pacific in the second half of the year. The outlook for 2021 appears positive, however, much depends upon a potential resurgence in COVID-19 infections and the speed at which vaccination programmes are conducted around the region.

After an estimated contraction of – 3.3% in 2020, the global economy is projected to grow at 6% in 2021, moderating to 4.4% in 2022. The projections for 2021 and 2022 are 0.8% point and 0.2% point stronger than in the previous forecast, reflecting additional fiscal support in a few large economies and the anticipated vaccine-powered recovery in the second half of the year. GDP levels are projected to remain well below the pre-pandemic trend path through 2024 for most countries.

Global prospects remain highly uncertain one year into the pandemic. New virus mutations and the accumulating human toll raise concerns, even as growing vaccine coverage lifts sentiment. Economic recoveries are diverging across countries and sectors.

Indian Economy

The Covid -19 pandemic gave rise to a once-in-a-century global crisis in 2020 – a unique recession where 90% of countries are expected to experience a contraction in GDP per capita. Faced with unprecedented uncertainty at the onset of the pandemic, India focused on saving lives and livelihoods by its willingness to take short-term pain for long term gain. India's response stemmed from the humane principle advocated strongly in the Mahabharata that "Saving a life that is in jeopardy is the origin of dharma." Therefore, India recognised that while GDP growth will recover from the temporary shock caused by the pandemic, human lives that are lost cannot be brought back. In view of high population density; India's vulnerable elderly population in absolute numbers; and an overburdened health infrastructure led to India imposing the most stringent lockdown at the very onset of the pandemic. This enabled flattening of the pandemic curve and, thereby, provided the necessary time to ramp up the health and testing infrastructure.

As India has developed its own vaccine and the process of vaccination is ongoing on a very large scale in the whole country and it is expected the whole country will get fully vaccinated by the end of 2021 and the country will be able to curb the spread of Covid-19 cases.

While there was a 23.9% contraction in GDP in Q1, the recovery

has been a V-shaped one as seen in the 7.5% decline in Q2 and the recovery across all key economic indicators. In line with learning from economic research, economic activity in States with higher initial stringency has rebounded faster during the year. On the economic policy front, India recognized that, unlike previous crises, the Covid pandemic affects both demand and supply. Therefore, a slew of structural reforms were announced.

Expressways:

The infrastructure sector has become one of the biggest focus area for the Government of India. India plans to spend US\$ 1.4 trillion on infrastructure during 2019-23 to have a sustainable development of the country. The Government has suggested investment of Rs. 5,000,000 crore for railways infrastructure from 2018-30.

According to the Department for Promotion of Industry and Internal Trade (DPIIT), FDIs in the construction development sector (townships, housing, built up infrastructure and construction development projects) and construction (infrastructure) activities stood at US\$ 26.08 billion and US\$ 24.72 billion, respectively, between April 2000 and March 2021. In FY21, infrastructure activities accounted for 13% share of the total FDI inflows of US\$ 81.72 billion.

In Union Budget 2021, the government has given a massive push to the infrastructure sector by allocating Rs. 233,083 Crore (US\$ 32.02 billion) to enhance the transport infrastructure. The government expanded the 'National Infrastructure Pipeline (NIP)' to 7,400 projects, 217 projects worth Rs. 1.10 Lakh Crore were completed as of 2020.

NCR's second airport, coming up at Jewar in Greater Noida, will be known as Noida International Airport and is expected to become reality in the year 2023 with an annual passenger handling capacity of 60 lacs. With six runways, once all its expansions are completed, it will be India's largest airport and among the world's largest airports. The Noida International airport project is expected to lead to higher toll collection besides the desired push to commercial and residential development in the NCR region which in turn will push the capital value upward.

It will also accelerate the economic development in the region across different segments – Residential, Commercial, Institutional, Industrial & Recreational. The Uttar Pradesh government had earmarked about 5,000 hectares of land in Jewar on Yamuna Expressway for an aviation and transport hub, linking the Indian capital to a greenfield airport that is expected to serve the eastern and southeastern suburbs of the sprawling metropolis. Agra Lucknow Expressway, Circular Agra Ring Road and proposed film city along the expressway. are also likely to provide further impetus to the economic growth in the region.

The Management is responsible for overseeing the Company's financial reporting process.

Auditor's Responsibility for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

2. Significant Accounting Policies

a) Basis of preparation:-

These financial statements are prepared in accordance with Indian Accounting Standard (Ind AS), under the historical cost convention on the accrual basis, except for certain financial instruments which are measured at fair value, and requirements per division II of schedule III to the Companies Act, 2013 ('the Act') (to the extent notified) and guidelines issued by the Securities and Exchange Board of India (SEBI). The Ind AS are prescribed under Section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 (as amended).

The standalone financial statements have been prepared on a going concern basis in accordance with accounting principles generally accepted in India.

Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use or when the change will result in more reliable and relevant information.

b) Use of Estimates:-

The preparation of the financial statements in conformity with Ind AS requires the management to make estimates, judgments and assumptions. These estimates, judgments and assumptions affect the application of accounting policies and the reported amount of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the financial statements and reported amount of Income and expenses during the period. The application of accounting policies that require critical accounting estimates involving complex and subjective judgments and the use of assumptions in these financial statements have been disclosed. Accounting estimates could

change from period to period. Actual results could differ from those estimates. Appropriate change in estimates is made as management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to financial statements.

i. Significant management judgments

The preparation of the financial statements in conformity with recognition and measurement principles of Ind AS requires the Management to make judgments, estimates and assumptions considered in the reported amount of assets and liabilities (including contingent liabilities) and the reported income and expenses during the year. The Management believes that these assumptions and estimates used in preparation of the financial statements are prudent and reasonable. The actual results could differ due to these estimates. The differences between the actual results and the estimates are recognized in the period in which the results are known/materialize.

- **Recognition of Deferred Tax Assets and Minimum Alternate Tax (MAT) Credit** – The extent to which deferred tax assets and MAT Credit can be recognized is based on an assessment of the probability of the future taxable income against which the deferred tax assets and MAT credit can be utilized.
- **Evaluation of indicators for impairment of assets** – The evaluation of applicability of indicators of impairment of assets requires determination of cash generating units and assessment of several external and internal factors which could result in deterioration of recoverable amount of assets.
- **Impairment of financial assets** – The management assesses the expected credit loss on outstanding financial assets at each balance sheet date, based on historical default rates observed over expected life, current conditions and forecasts of future economic conditions.
- **Provisions** – The management assesses the requirement of provisions against the outstanding contingent liabilities at each balance sheet date based on the management judgment, changes in facts and legal aspects. However the actual outcome may be different from judgment.

ii. Significant estimates

- **Revenue and Inventories** – Inventory recognition requires forecasts to be made of the total budgeted costs with the outcomes of underlying construction and service contracts which require assessment and judgment to be made on changes in scope of work, claim (compensation, rebates, etc) and other payments to the extent they are probable and they are capable of being reliably measured.
- **Net realizable value of inventory and Inventory write down** – The determination of net realizable value of inventory involves estimates based on prevailing market conditions, current prices and expected date

of commencement and completion of the Real Estate project, the estimated future selling price, cost to complete, selling cost and other factors.

- **Revenue recognition** – Recognition of revenue at a point in time based on satisfaction of performance obligation requires estimates and judgements regarding timing of satisfaction of performance obligation, allocation of cost incurred to segment/units and the estimated cost for completion of pending works.
- **Useful lives of depreciable/amortizable assets** – Management reviews its estimate of the useful lives of depreciable/ amortizable assets at each reporting date, based on the expected utility of the assets. Uncertainties in these estimates relate to technical and economic obsolescence that may change the utility of the assets.
- **Defined Benefit obligations (DBO)** – Management's estimates of the DBO is based on a number of underlying assumptions such as standard rates of inflation, mortality, discount rate and anticipation of future increase in salary etc. Variation in these assumptions may significantly impact the DBO amount and the annual defined benefit / expenses.
- **Fair value measurements** – Management applies valuation techniques to determine the fair market value of financial instruments (where active market quotes are not available). This involves developing estimates and assumptions consistent with how market participants would price the instrument.

c) Summary of Significant Accounting Policies:

1. Current & Non Current classification:

All assets & liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Act.

An asset is classified as current when it satisfies any of the following criteria:—

- a) it is expected to be realized in, or is intended for sale or consumption in, the company's normal operating cycle;
- b) it is held primarily for the purpose of being traded;
- c) it is expected to be realized within twelve months after the reporting date; or
- d) it is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date.

All other assets are classified as non-current.

A liability is classified as current when it satisfies any of the following criteria:—

- a) it is expected to be settled in the company's normal operating cycle;
- b) it is held primarily for the purpose of being traded;
- c) it is due to be settled within twelve months after the

reporting date; or

- d) the company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

All other liabilities are classified as non-current.

Deferred Tax assets and liabilities are classified as non-current assets and non-current liabilities, as the case may be.

The operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents.

The company has ascertained its operating cycle as 12 months for the purpose of current or non current classification of assets and liabilities except for Real Estate. Operating cycle for Real Estate is ascertained as 4 to 5 years.

2. Property, Plant and Equipment (PPE): -

Transition to Ind AS

The Company has elected to use a previous GAAP cost (cost less accumulated depreciation and impairment losses (if any)) of an item of property, plant and equipment at, or before, the date of transition to Ind AS as deemed cost at the date of transition in accordance with option provided under Ind AS 101.

PPE are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any.

The initial cost of PPE comprise of its cost of acquisition or construction inclusive of freight, erection & commissioning charges, duties and taxes and other incidental expenses related thereto.

All other expenditure related to existing assets including day-to-day repair and maintenance expenditure and cost of replacement parts, are charged to the Statement of Profit and Loss in the period during which such expenditure is incurred.

The carrying amount of a property, plant and equipment is de-recognized when no future economic benefits are expected from its use or on disposal. Gains and losses on de-recognition/disposals are determined as the difference between the net disposal proceeds and the carrying amount of those assets. Gains and Losses if any, are recognized in the statement of profit or loss on de-recognition or disposal as the case may be. Machine spares that can be used only in connection with an item of fixed asset and their use is expected for more than one year are capitalized.

Property, plant and equipment are subsequently measured at cost net of accumulated depreciation and accumulated impairment losses, if any. Depreciation on property plant and equipment is provided from the date the assets are put to use, on straight line method based on estimated useful life of assets as prescribed in Schedule II to the Companies Act, 2013 and detailed hereunder:

S. No.	Assets	Useful Life [In Years]
1	Building	5 to 60
2	Purely Temporary Erection	1 to 3
3	Plant & Equipments	8 to 40
4	Vehicles	6 to 10
5	Furniture & Fixture	8 to 10
6	Office Equipments	5
7	Computers and data processing units	3 to 6

The property, plant and equipment acquired under finance leases, if any, is depreciated over the asset's useful life or over the shorter of the asset's useful life and the lease term if there is no reasonable certainty that the Company will obtain ownership at the end of the lease term.

3. Intangible Assets:-

The company has elected to use a previous GAAP cost (cost less accumulated depreciation and impairment losses (if any)) of an intangible assets at, or before, the date of transition to Ind AS as deemed cost at the date of transition in accordance with Ind AS 101.

Intangible assets acquired separately are measured on initial recognition at cost less accumulated amortization and accumulated impairment losses, if any.

The cost of an intangible asset includes purchase cost (net of rebates and discounts), including any import duties and non-refundable taxes, and any directly attributable costs on making the asset ready for its intended use.

The Cost of Intangible assets are amortized on a straight line basis over their estimated useful life. Amortization of Intangible Assets (Toll Road) is provided in the manner prescribed in Serial-3(ii) of Part 'A' of Schedule II to the Companies Act, 2013 according to which the cost of intangible assets is amortized over the useful life in the ratio of actual revenue for the year to projected revenue from intangible assets till the end of concession period.

The estimated useful life of toll Road is taken as the concession period i.e. 36 (thirty six) years.

The amortization period and method are reviewed at least at the end of each reporting period. If the expected useful life of the asset is significantly different from previous estimates, the amortization period is changed accordingly.

An intangible asset is de-recognized on disposal or when no future economic benefits are expected from use. Gains and losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the Statement of Profit and Loss when the asset is de-recognized or on disposal.

4. Capital work-in-progress and intangible assets under development

Capital work-in-progress represents expenditure incurred in respect of capital projects and are carried at cost less accumulated impairment loss, if any. Cost includes acquisition expense, development/ construction cost, borrowing costs

and other direct expenditure.

Post commencement of operations of the Yamuna Expressway, the company has discontinued the practice of recognition of Intangible assets under development. The expenditure incurred during the year on the balance items which are part of the substantial completion certificate is capitalized at the end of each reporting period.

5. Investment in equity instruments of subsidiaries

Investment in equity instruments of subsidiaries are stated at cost less impairment, if any.

6. Inventories:-

Undeveloped Land other than area transferred to Project under development are valued at lower of cost or net realizable value. Cost includes land (including development rights and land under agreement to purchase) acquisition cost, lease rent, borrowing cost, estimated internal development costs and external development charges.

The developed plots and the completed built-up units are valued at lower of cost or net realizable value.

Project under development includes the cost of land, internal development costs, external development charges, construction costs, overheads, borrowing costs and is valued at lower of cost/estimated cost or net realizable value.

Stores & Spares are valued at lower of weighted average cost or net realizable value.

Traded goods are valued at lower of weighted average cost or net realizable value.

Net realizable value is the estimated selling price in the ordinary course of business less estimated costs of completion and estimated costs necessary to effect the sale.

7. Impairment of non financial assets

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication based on internal/ external factors that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually and/or whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market

assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in statement of profit or loss.

The impairment loss recognized in prior accounting period is reversed if there has been a change in the estimate of recoverable amount

8. Foreign Exchange Transactions:-

These financial statements are presented in Indian rupees (INR), which is the Company's functional currency.

Transactions in foreign currency are recorded on initial recognition at the spot rate prevailing at the time of the transaction.

At the end of each reporting period

- Monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date.
- Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined.
- Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous financial statements are recognised in the statement of profit or loss in the period in which they arise.

Exchange differences on monetary items are recognised in the statement of profit or loss in the period in which they arise except for:

- i. Exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as adjustment to interest costs on those foreign currency borrowings.
- ii. The exchange differences arising on reporting of long term foreign currency monetary items at rates different from those at which they were initially recorded in so far as they relate to the acquisition of depreciable capital assets are shown by addition to/deduction from the cost of the assets as per exemption provided under IND AS 21 read with Ind AS 101.

9. Borrowing Cost:-

Borrowing costs specifically relating to the acquisition or construction of a qualifying asset that necessarily takes a substantial period of time to get ready for its intended use are capitalized as part of the cost of the asset. All other borrowing costs are charged to profit & loss account in the period in which it is incurred except loan processing fees which is

recognized as per Effective Interest Rate method. Borrowing costs consist of interest and other costs that Company incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

10. Employee Benefits:-

Contribution to Provident fund/Pension fund:

Retirement benefits in the form of Provident fund / Pension Schemes are defined contribution schemes and the contributions are charged to the Profit & Loss Account in the year when the contributions to the respective funds become due. The Company has no obligation other than contribution payable to these funds.

Gratuity:

Gratuity liability is a defined benefit obligation and is provided for on the basis of an actuarial valuation made at the end of each financial year. Jaiprakash Associates Limited (JAL) (the holding company) has constituted a gratuity fund trust under the name 'Jaiprakash Associates Employees Gratuity Fund Trust' vide Trust Deed dated 30th March, 2009 for JAL and its subsidiaries and appointed SBI Life Insurance Co. Ltd. for the management of the trust funds for the benefit of employees. As a subsidiary of JAL, the Company is participating in the trust fund by contributing its liability accrued up to the close of each financial year to the trust fund. The difference between the actuarial valuation of gratuity for employees at the end of the reporting period and the balance of funds with trust is provided for as liability in the books.

Earned leave / compensatory absence:

Liability in respect of the earned leave including compensatory absence is estimated on the basis of an actuarial valuation performed by an independent actuary using the projected unit credit method.

Actuarial gains/losses arising from past experience and changes in actuarial assumptions are charged to statement of profit and loss in the year in which such gains or losses are determined.

Short-term employee benefits:

Expenses in respect of short-term benefits is recognized on the basis of the amount paid or payable for the period during which services are rendered by the employee.

Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding net interest), is reflected immediately in the balance sheet with a charge or credit recognized in other comprehensive income in the period in which they occur. Remeasurement recognized in other comprehensive income is reflected immediately in retained earnings and is not reclassified to statement of profit or loss. Past service cost is recognized in the statement of profit or loss in the period of a plan amendment.

While determining the past service cost at the time of plan amendment or curtailment, the amount of net defined benefit liability/asset is remeasured using the current value of plan assets and current actuarial assumptions which reflect the

benefits offered under the plan and plan assets before and after the plan amendment, curtailment and settlement.

11. Tax Expenses:-

Income Tax expense comprises of current tax and deferred tax charge. Provision for current tax is made with reference to taxable income computed for the financial year for which the financial statements are prepared by applying the tax rates as applicable.

Current Tax:- Current Income tax relating to items recognized outside the profit and loss is recognized outside the profit and loss (either in other comprehensive income or in equity)

MAT:- Minimum Alternate Tax (MAT) paid in a year is charged to the Statement of Profit and Loss as current tax. The company recognizes MAT credit available as an asset only to the extent there is convincing evidence that the company will pay normal income tax during the specified period, i.e., the period for which MAT Credit is allowed to be carried forward. In the year in which the Company recognizes MAT Credit as an asset in accordance with the Guidance Note on Accounting for Credit Available in respect of Minimum Alternate Tax under the Income Tax Act, 1961, the said asset is created by way of credit to the Statement of Profit and Loss and shown as "MAT Credit Entitlement." The Company reviews the "MAT Credit Entitlement" asset at each reporting date and writes down the asset to the extent the company does not have convincing evidence that it will pay normal tax during the sufficient period. MAT is recognized under Other Non-current Assets.

Deferred Tax:- Deferred tax is provided using the balance sheet approach on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purpose at reporting date. Deferred income tax assets and liabilities are measured using tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date and are expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect of changes in tax rates on deferred income tax assets and liabilities is recognized as income or expense in the period that includes the enactment or the substantive enactment date. A deferred income tax asset is recognized to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences and tax losses can be utilized.

The carrying amount of deferred tax assets is reviewed as at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will not be available against which deferred tax asset shall be utilized. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognized to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets are recognized for the unused tax credit to the extent that it is probable that taxable profits will be available against which the losses will be utilized. Significant management judgement is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and the level of future taxable profits.

The company identifies the tax consequence of an item whose tax treatment is uncertain. Tax treatment of an item is considered as uncertain when there is uncertainty whether the relevant taxation authority will accept the tax treatment of that item or not. If there is uncertainty over tax treatment of an item the company predicts the resolution of the uncertainty. If it is probable that the taxation authority will accept the tax treatment, there will be no impact on the amount of taxable profits/losses, tax bases, unused tax losses/credits and tax rates. In vice-versa case, the company shows the effect of the uncertainty for each uncertain tax treatment on amount of related items by using either the most likely outcome or the expected outcome of the uncertainty.

12. Leases:-

The Company (lessee) does treat all leases, except leases for short-term and leases of low value assets, as finance leases. The Company does recognize a right-of-use asset and a lease liability whenever it takes any asset on lease. The right-of-use asset is measured at cost that comprises of initial value of lease liability, lease payments made on or before the commencement of lease, initial direct costs incurred by the Company and an initial estimated cost of dismantling & removing the leased asset and restoring the site on which the asset is located. The lease liability is measured at the present value of the lease payments due. The interest rate implicit in the lease or lessee's incremental borrowing is used to arrive at the present value. Subsequently, at each balance sheet date, the right-of-use asset is depreciated and lease liability is increased by interest amount & decreased by amount paid.

The Company (lessor) classify each of its leases as either an operating lease or a finance lease.

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset. A lease is classified as an operating lease if it does not transfer substantially all risks and rewards incidental to ownership of an underlying asset.

Under finance lease, at the commencement date, the Company does recognize assets held under a finance lease in its balance sheet and present them as a receivable at an amount equal to the net investment in the lease. The Company (lessor) use interest rate implicit in the lease to measure the net investment in the lease.

At the commencement date, the lease payments included in the measurement of the net investment in the lease comprise the fixed payments, variable lease payments that depend on an index or a rate, any residual value guarantees provided to the Company (lessor) by the lessee, the exercise price of a purchase option, payments of penalties for terminating the lease for the right to use the underlying asset during the lease term that are not received at the commencement date.

Under operating lease, the Company (lessor) does recognize lease payments from operating leases as income on a straight-line basis.

The Company (lessor) does apply Ind AS 36 to determine whether an underlying asset subject to an operating lease is impaired and to account for any impairment loss identified.

As a practical expedient, the Company is not required to reassess whether a contract is, or contains, a lease at the date of initial application.

The company (lessor) is not required to make any adjustments on transition for leases in which it is a lessor and does account for those leases from the date of initial application.

13. Fair Value Measurement:-

The Company measures financial instruments at fair value at each balance sheet date.

Fair value is the price that would be received on sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability or
- In the absence of a principal market, in the most advantageous market for the asset or liability

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by application of the highest and best use for the assets or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 : Quoted (unadjusted) market prices in active markets for identical assets or liabilities.

Level 2 : Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.

Level 3 : Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For the purpose of fair value disclosures, the Company has determined classes of assets & liabilities on the basis of the nature, characteristics and the risks of the asset or liability and the level of the fair value hierarchy as explained above.

14. Financial Instrument

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets include Trade receivable, loan to body corporate, loan to employees, security deposits and other eligible current and non-current assets

Financial liabilities include Loans, trade payable and eligible

current and non-current liabilities

i. Transitional Provisions in opening balance sheet per Ind AS 101

The Company designates a previously recognized financial asset/financial liability as a financial asset/financial liability measured at fair value on the basis of the facts and circumstances that exist at the date of transition to Ind AS.

The Company designates an investment in an equity instrument other than investment in subsidiary, associates and Joint venture as at fair value through other comprehensive income on the basis of the facts and circumstances that exist at the date of transition to Ind AS.

The Company has assessed whether a financial asset meets the conditions w.r.t classification criteria on the basis of the facts and circumstances that exist at the date of transition to Ind AS, is practically feasible.

ii. Classification:-

The Company classifies financial assets as subsequently measured at amortized cost, fair value through other comprehensive income or fair value through profit or loss on the basis of:

- the Company's business model for managing the financial assets and
- the contractual cash flow characteristics of the financial asset.

A financial asset is measured at amortized cost if both the following conditions are met:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and
- the contractual terms of the financial asset gives on specified dates, cash flows that are solely payments of principal and interest on the principal amount outstanding.

A financial asset is measured at fair value through other comprehensive income if both of the following conditions are met:

- the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A financial asset is measured at fair value through profit or loss unless it is measured at amortized cost or at fair value through other comprehensive income.

All financial liabilities are subsequently measured at amortized cost using the effective interest method or fair value through profit or loss.

The Financial instruments having prepayment feature

with negative compensation are classified as measured at amortized cost, or measured at fair value through profit or loss, or measured at fair value through other comprehensive income if the respective conditions specified under Ind AS 109 are satisfied.

iii. Initial recognition and measurement:-

The company recognizes financial assets and financial liabilities when it becomes a party to the contractual provisions of the instrument. All financial assets and liabilities are recognized at fair value at initial recognition, plus or minus, any transaction cost that are directly attributable to the acquisition or issue of financial assets and financial liabilities that are not at fair value through profit or loss.

iv. Financial assets subsequent measurement:-

Financial assets subsequent measured is carried out at amortized cost, fair value through other comprehensive income (FVOCI) or fair value through profit or loss (FVTPL) as the case may be.

Financial liabilities as subsequent measured is carried out at amortized cost or fair value through profit or loss.

v. Effective interest method :-

The effective interest method is a method of calculating the amortized cost of a debt instrument and allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts the estimated future cash payments or receipts through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Income is recognized on an effective interest basis for debt instruments other than those financial assets classified as, at FVTPL. Interest income is recognized in the statement of profit or loss and is included in the "Other income".

vi. Trade Receivables:-

Trade receivables are the contractual right to receive cash or other financial assets and are recognized initially at fair value. Subsequently they are measured at amortized cost (Initial fair value less expected credit loss). Expected credit loss is the difference between all contractual cash flows that are due to the company and all that the company expects to receive over the lifetime of a financial asset.

The company applies the simplified approach of IND AS 109, which requires measurement of loss allowance at an amount equal to lifetime expected credit losses. Lifetime expected credit losses are the expected credit losses that result from all possible default events over the expected life of a financial assets.

vii. Equity investments:-

All equity investments in scope of Ind AS 109 are measured at fair value other than investment in subsidiary, Associates and Joint venture. For all other equity instruments, the company may make an irrevocable

election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument by- instrument basis

viii. Cash and cash Equivalents:-

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

ix. Impairment of Financial Assets:-

The company recognizes loss allowance using the expected credit loss (ECL) model for the financial assets which are not fair valued through the statement of profit or loss. Loss allowance for trade receivables with no significant financing component is measured at an amount equal to lifetime expected credit loss (ECL). For all other financial assets, expected credit loss is measured at an amount equal to the 12-month ECL, unless there has been a significant increase in credit risk from initial recognition in which case those are measured at lifetime ECL. The amount of expected credit loss (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognized is recognized as an impairment gain or loss in the statement of profit or loss.

Impairment of non-financial assets:

At each reporting date, the company does assess whether there is any indication, that any asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the recoverable amount of the asset is estimated. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets. When the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount and the impairment loss is recognized in the statement of profit and loss.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessment of the time value of money and the risks specific to the assets.

If, at the reporting date there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount. Impairment losses previously recognized are accordingly reversed in the statement of profit and loss.

x. Financial liabilities:-

Financial liabilities are recognized initially at fair value less any directly attributable transaction costs. These are subsequently carried at amortized cost using the effective interest method or fair value through profit or loss. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts

are approximate fair value due to the short maturity of these instruments

xi. Trade payables :-

Trade payables represent liabilities for goods and services provided to the Company prior to the end of financial year and which are unpaid. Trade payables are presented as current liabilities unless payment is not due within 12 months after the reporting period or not paid/payable within operating cycle. They are recognized initially at their fair value and subsequently measured at amortized cost using the effective interest method.

xii. Borrowings:-

Borrowings are initially recognized at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortized cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognized in the statement of profit or loss over the period of the borrowings using the effective interest method. Fees paid on the availing of loan facilities are recognized as transaction costs of the loan.

Borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period. Where there is a breach of a material provision of a long-term loan arrangement on or before the end of the reporting period with the effect that the liability becomes payable on demand on the reporting date, the company does not classify the liability as current, if the lender agreed, not to demand payment as a consequence of the breach, after the reporting period and before the approval of the financial statements for issue,.

xiii. Equity Instruments:-

An equity instrument is any contract that evidences a residual interest in the assets of company after deducting all of its liabilities. Equity instruments are recognized at the proceeds received, net of direct issue costs.

xiv. Derecognition of financial instrument:-

The company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognized from the company's balance sheet when the obligation specified in the contract is discharged or cancelled or expires.

xv. Offsetting of financial instruments:-

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously. The Company does report separately both assets and liabilities, and income and expenses. Offsetting in the statement of profit and loss or balance

sheet, except when offsetting reflects the substance of the transaction or other event, detracts from the ability of users both to understand the transactions, other events and conditions that have occurred and to assess the Company's future cash flows.

xvi. Financial guarantee

Financial guarantee contracts issued by the entities are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognized initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of IND AS 109 and the amount recognized less cumulative amortization. Since the company has been under CIR process financial guarantee contracts have not been recorded as liability in books.

15. Provisions, Contingent Liability and Contingent Assets:-

- i. A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

Contingent liabilities, if material, are disclosed by way of notes unless the possibility of an outflow of resources embodying the economic benefit is remote.

- ii. A provision is recognized, when company has a present obligation (legal or constructive) as a result of past events and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, in respect of which a reliable estimate can be made for the amount of obligation. The expense relating to the provision is presented in the Statement of Profit and Loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

- iii. **Onerous contract**

The Company does recognize and measure as a provision the present obligation under an onerous contract, an onerous contract being a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it.

iv. Contingent Asset

Contingent assets are not recognized but the related asset is disclosed when inflow of economic benefits is probable.

16. Earnings Per Share:-

Basic Earnings per share is computed by dividing the net profit or loss for the year attributable to equity shareholders (after deducting preference dividends) after tax by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the year is adjusted for events of bonus issue and buy back. For the purpose of calculating Diluted earnings per share, the net profit for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effect of all dilutive potential equity shares.

17. Statement of Cash Flows:-

Cash Flows are reported using the indirect method, whereby profit after tax is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of future or past operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows are segregated into operating, investing and financing activities.

18. Segment Reporting:-

The Company comprise of only one segment i.e. Yamuna Expressway Project, an integrated and indivisible project which inter-alia includes construction, operation and maintenance of Yamuna Expressway and rights for land development of 25 million sq.mtr. along the Expressway. Accordingly, the same is treated as a single cash generating unit for the purpose of impairment testing

19. Revenue:-

The terms of the Concession Agreement with Yamuna Expressway Industrial Development Authority (YEIDA) provides for development, operation and maintenance of the six – lane access controlled expressway along with service road and associated structures etc. between Greater Noida and Agra and development of 25 million Sq.mtr. of land at five locations along the expressway. - (i) The revenue therefrom is recognized as under:
 - (a) The Revenue from Expressway is recognized based on toll fee collected.
 - (b) The Revenue from road side facilities is recognized on accrual basis.

- (ii) Interest income is recognized using the effective interest rate (EIR) EIR is the rate that exactly discounts the estimated future cash flows over the expected life of financial instrument, to the gross carrying amount of the financial assets or to the amortized cost of the financial liability.
- (iii) Earnest Money forfeited from customers is accounted for in the year of forfeiture. These items are included in the head “Miscellaneous Income” under the head ‘Other Income’ in the Statement of Profit and Loss.
- (iv) Dividend income is recognized when the Company’s right to receive payment is established, provided that it is probable that the economic benefit will flow to the company.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Group and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the consolidated financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going

concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The Management is responsible for overseeing the Group's financial reporting process.

Auditor's Responsibility for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Group has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group and its subsidiary to express an opinion on the

consolidated financial statements. We are responsible for the direction, supervision and performance of the audit of the financial statements of such entity included in the consolidated financial statements of which we are the independent auditors. For the other entity included in the consolidated financial statements, which have been audited by other auditor, such other auditor remain responsible for the direction, supervision and performance of the audit carried out by them. We remain solely responsible for our audit opinion.

Materiality is the magnitude of misstatements in the consolidated financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

The Hon'ble NCLT, Principal Bench (Delhi) vide its order dated 03.03.2020 approved the Resolution Plan of NBCC. However, NBCC filed an appeal against Hon'ble NCLT order on 20.03.2020 with Hon'ble National Company Law Appellate Tribunal (NCLAT).

Further, Hon'ble NCLAT vide its order dated 22.04.2020 provides that the approved Resolution Plan may be approved subject to outcome of appeal and Interim Resolution Professional (IRP) may constitute an Interim Monitoring Committee ("IMC") comprising of IRP, NBCC and three largest lenders of JIL i.e. IDBI Bank Limited, India Infrastructure Limited (IIFCL) and Life Insurance Corporation of India (LIC). IMC, in its first meeting dated 27.04.2020, determined role, responsibilities, powers and functions of IMC including manage the operations of the Holding company as going concern.

Hon'ble Supreme Court of India vide order dated 06.08.2020 directed all appeals pending before the Hon'ble NCLAT shall stand transferred to this Court. Hon'ble Supreme Court further directed the IRP to continue to manage the affairs of the Holding company and there shall be ad interim stay of the operation of the impugned Hon'ble NCLAT order dated 22.04.2020. Further, directions were passed by the Hon'ble Supreme Court of India vide order dated 10.09.2020 that since the entire resolution plan is pending consideration in these proceedings before this Court, it is appropriate that no coercive action be taken by any person/ authority against the Holding Company until further orders on the principle underlying Section 14 of the Insolvency and Bankruptcy Code, 2016.

Hon'ble Supreme Court of India vide its order dated 24.03.2021 has directed the IRP to complete the CIRP within the extended time of 45 days by inviting modified/fresh resolution plans from Suraksha Realty and NBCC only. Pursuant to the directions of Hon'ble Supreme Court of India, IRP invited fresh/modified Resolution Plan from Suraksha Realty and NBCC. Consequently, Suraksha Realty and NBCC have submitted their bids on 07.04.2021. Upon discussion of said resolution plans in CoC from time to time, both applicants have revised their bids. CoC sought extension from Hon'ble Supreme Court 07.07.2021 to complete CIRP of the Holding company and both the applicants have submitted their final resolution plan which are put to vote by the CoC.

IRP is currently managing the operations of the Holding company and financial statements have been prepared on going concern basis.

The respective management of the holding company and the subsidiary company are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Group considering the essential components of internal control stated

in the Guidance Note on Audit of Internal Financial Controls with reference to financial statements issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to group's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Group's Internal Financial Controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls with reference to financial statements (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate Internal Financial Controls with reference to financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the Internal Financial Controls with reference to financial statements and their operating effectiveness. Our audit of Internal Financial Controls with reference to financial statements included obtaining an understanding of Internal Financial Controls with reference to financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained and the audit evidence obtained by the other auditor in terms of their report referred to in the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the Group's Internal Financial Controls with reference to financial statements.

Meaning of Internal Financial Controls with reference to financial statements

A group's Internal Financial Controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation

of consolidated financial statements for external purposes in accordance with generally accepted accounting principles. A group's Internal Financial Controls with reference to financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the group; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the group are being made only in accordance with authorisations of management and directors of the group; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the group's assets that could have a material effect on the consolidated financial statements.

Inherent Limitations of Internal Financial Controls with reference to financial statements

Because of the inherent limitations of Internal Financial Controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the Internal Financial Controls with reference to financial statements to future periods are subject to the risk that the Internal Financial Controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Group, have in all material respects, an adequate Internal Financial Controls with reference to financial statements and such Internal Financial Controls with reference to financial statements were operating effectively as at 31 March 2021, based on the internal control over financial reporting criteria established by the Group considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls with reference to financial statements issued by the Institute of Chartered Accountants of India.

2. Significant Accounting Policies

a) Basis of preparation:-

These financial statements are prepared in accordance with Indian Accounting Standard (Ind AS), under the historical cost convention on the accrual basis, except for certain financial instruments which are measured at fair value, and requirements per division II of schedule III to the Companies Act, 2013 ('the Act') (to the extent notified) and guidelines issued by the Securities and Exchange Board of India (SEBI). The Ind AS are prescribed under Section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 (as amended).

The standalone financial statements have been prepared on a going concern basis in accordance with accounting principles generally accepted in India.

Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use or when the change will result in more reliable and relevant information.

b) Use of Estimates:-

The preparation of the financial statements in conformity with Ind AS requires the management to make estimates, judgments and assumptions. These estimates, judgments and assumptions affect the application of accounting policies and the reported amount of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the financial statements and reported amount of Income and expenses during the period. The application of accounting policies that require critical accounting estimates involving complex and subjective judgments and the use of assumptions in these financial statements have been disclosed. Accounting estimates could change from period

to period. Actual results could differ from those estimates. Appropriate change in estimates is made as management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to financial statements.

i. Significant management judgments

The preparation of the financial statements in conformity with recognition and measurement principles of Ind AS requires the Management to make judgments, estimates and assumptions considered in the reported amount of assets and liabilities (including contingent liabilities) and the reported income and expenses during the year. The Management believes that these assumptions and estimates used in preparation of the financial statements are prudent and reasonable. The actual results could differ due to these estimates. The differences between the actual results and the estimates are recognized in the period in which the results are known/materialize.

- **Recognition of Deferred Tax Assets and Minimum Alternate Tax (MAT) Credit** – The extent to which deferred tax assets and MAT Credit can be recognized is based on an assessment of the probability of the future taxable income against which the deferred tax assets and MAT credit can be utilized.
- **Evaluation of indicators for impairment of assets** – The evaluation of applicability of indicators of impairment of assets requires determination of cash generating units and assessment of several external and internal factors which could result in deterioration of recoverable amount of assets.
- **Impairment of financial assets** – The management assesses the expected credit loss on outstanding financial assets at each balance sheet date, based on historical default rates observed over expected life, current conditions and forecasts of future economic conditions.
- **Provisions** – The management assesses the requirement of provisions against the outstanding contingent liabilities at each balance sheet date based on the management judgment, changes in facts and legal aspects. However the actual outcome may be different from judgment.

ii. Significant estimates

- **Revenue and Inventories** – Inventory recognition requires forecasts to be made of the total budgeted costs with the outcomes of underlying construction and service contracts which require assessment and judgment to be made on changes in scope of work, claim (compensation, rebates, etc) and other payments to the extent they are probable and they are capable of being reliably measured.
- **Net realizable value of inventory and Inventory write down** - The determination of net realizable value of inventory involves estimates based on prevailing market conditions, current prices and expected date of commencement and completion of the Real Estate project, the estimated future selling price, cost to complete, selling cost and other factors.

- **Revenue recognition** - Recognition of revenue at a point in time based on satisfaction of performance obligation requires estimates and judgements regarding timing of satisfaction of performance obligation, allocation of cost incurred to segment/units and the estimated cost for completion of pending works.
- **Useful lives of depreciable/ amortizable assets** – Management reviews its estimate of the useful lives of depreciable/ amortizable assets at each reporting date, based on the expected utility of the assets. Uncertainties in these estimates relate to technical and economic obsolescence that may change the utility of the assets.
- **Defined Benefit obligations (DBO)** – Management's estimates of the DBO is based on a number of underlying assumptions such as standard rates of inflation, mortality, discount rate and anticipation of future increase in salary etc. Variation in these assumptions may significantly impact the DBO amount and the annual defined benefit / expenses.
- **Fair value measurements** – Management applies valuation techniques to determine the fair market value of financial instruments (where active market quotes are not available). This involves developing estimates and assumptions consistent with how market participants would price the instrument.

c) Summary of Significant Accounting Policies:

1. Current & Non Current classification:

All assets & liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Act.

An asset is classified as current when it satisfies any of the following criteria:-

- it is expected to be realized in, or is intended for sale or consumption in, the company's normal operating cycle;
- it is held primarily for the purpose of being traded;
- it is expected to be realized within twelve months after the reporting date; or
- it is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date.

All other assets are classified as non-current.

A liability is classified as current when it satisfies any of the following criteria: –

- it is expected to be settled in the company's normal operating cycle;
- it is held primarily for the purpose of being traded;
- it is due to be settled within twelve months after the reporting date; or
- the company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

All other liabilities are classified as non-current.

Deferred Tax assets and liabilities are classified as non-current

assets and non-current liabilities, as the case may be.

The operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents.

The company has ascertained its operating cycle as 12 months for the purpose of current or non current classification of assets and liabilities except for Real Estate. Operating cycle for Real Estate is ascertained as 4 to 5 years.

2. Property, Plant and Equipment (PPE): -

Transition to Ind AS

The Company has elected to use a previous GAAP cost (cost less accumulated depreciation and impairment losses (if any)) of an item of property, plant and equipment at, or before, the date of transition to Ind AS as deemed cost at the date of transition in accordance with option provided under Ind AS 101.

PPE are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any.

The initial cost of PPE comprise of its cost of acquisition or construction inclusive of freight, erection & commissioning charges, duties and taxes and other incidental expenses related thereto.

All other expenditure related to existing assets including day-to-day repair and maintenance expenditure and cost of replacement parts, are charged to the Statement of Profit and Loss in the period during which such expenditure is incurred.

The carrying amount of a property, plant and equipment is de-recognized when no future economic benefits are expected from its use or on disposal. Gains and losses on de-recognition/disposals are determined as the difference between the net disposal proceeds and the carrying amount of those assets. Gains and Losses if any, are recognized in the statement of profit or loss on de-recognition or disposal as the case may be. Machine spares that can be used only in connection with an item of fixed asset and their use is expected for more than one year are capitalized.

Property, plant and equipment are subsequently measured at cost net of accumulated depreciation and accumulated impairment losses, if any. Depreciation on property plant and equipment is provided from the date the assets are put to use, on straight line method based on estimated useful life of assets as prescribed in Schedule II to the Companies Act, 2013 and detailed hereunder:

S. No.	Assets	Useful Life [In Years]
1	Building	5 to 60
2	Purely Temporary Erection	1 to 3
3	Plant & Equipments	8 to 40
4	Vehicles	6 to 10
5	Furniture & Fixture	8 to 10
6	Office Equipments	5
7	Computers and data processing units	3 to 6

The property, plant and equipment acquired under finance leases, if any, is depreciated over the asset's useful life or over the shorter of the asset's useful life and the lease term if

there is no reasonable certainty that the Company will obtain ownership at the end of the lease term.

3. Intangible Assets:-

The company has elected to use a previous GAAP cost (cost less accumulated depreciation and impairment losses (if any)) of an intangible assets at, or before, the date of transition to Ind AS as deemed cost at the date of transition in accordance with Ind AS 101.

Intangible assets acquired separately are measured on initial recognition at cost less accumulated amortization and accumulated impairment losses, if any.

The cost of an intangible asset includes purchase cost (net of rebates and discounts), including any import duties and non-refundable taxes, and any directly attributable costs on making the asset ready for its intended use.

The Cost of Intangible assets are amortized on a straight line basis over their estimated useful life. Amortization of Intangible Assets (Toll Road) is provided in the manner prescribed in Serial-3(ii) of Part 'A' of Schedule II to the Companies Act, 2013 according to which the cost of intangible assets is amortized over the useful life in the ratio of actual revenue for the year to projected revenue from intangible assets till the end of concession period.

The estimated useful life of toll Road is taken as the concession period i.e. 36 (thirty six) years.

The amortization period and method are reviewed at least at the end of each reporting period. If the expected useful life of the asset is significantly different from previous estimates, the amortization period is changed accordingly.

An intangible asset is de-recognized on disposal or when no future economic benefits are expected from use. Gains and losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the Statement of Profit and Loss when the asset is de-recognized or on disposal.

4. Capital work-in-progress and intangible assets under development.

Capital work-in-progress represents expenditure incurred in respect of capital projects and are carried at cost less accumulated impairment loss, if any. Cost includes acquisition expense, development/ construction cost, borrowing costs and other direct expenditure.

Post commencement of operations of the Yamuna Expressway, the company has discontinued the practice of recognition of Intangible assets under development. The expenditure incurred during the year on the balance items which are part of the substantial completion certificate is capitalized at the end of each reporting period.

5. Inventories:-

Inventories are measured at the lower of cost and net realizable value on the weighted average cost basis. Net realizable value is the estimated selling price in the ordinary course of business, less applicable variable selling expenses. Cost of inventories comprises of all costs of purchase and other costs incurred in bringing the inventories to their present location, and condition inclusive of non-refundable (adjustable) taxes

wherever applicable.

Imported inventories are accounted for at the applicable exchange rates prevailing on the date of transaction.

Undeveloped Land other than area transferred to Project under development are valued at lower of cost or net realizable value. Cost includes land (including development rights and land under agreement to purchase) acquisition cost, lease rent, borrowing cost, estimated internal development costs and external development charges.

The developed plots and the completed built-up units are valued at lower of cost or net realizable value.

Project under development includes the cost of land, internal development costs, external development charges, construction costs, overheads, borrowing costs and is valued at lower of cost/estimated cost or net realizable value.

Stores & Spares are valued at lower of weighted average cost or net realizable value

Traded goods are valued at lower of weighted average cost or net realizable value

Net realizable value is the estimated selling price in the ordinary course of business less estimated costs of completion and estimated costs necessary to effect the sale.

6. Impairment of non financial assets

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication based on internal/ external factors that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually and/or whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in statement of profit or loss.

The impairment loss recognized in prior accounting period is reversed if there has been a change in the estimate of recoverable amount

7. Foreign Exchange Transactions:-

These financial statements are presented in Indian rupees (INR), which is the Company's functional currency.

Transactions in foreign currency are recorded on initial recognition at the spot rate prevailing at the time of the transaction.

At the end of each reporting period

- Monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date.
- Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined.
- Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous financial statements are recognized in the statement of profit or loss in the period in which they arise.

Exchange differences on monetary items are recognized in the statement of profit or loss in the period in which they arise except for:

- Exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as adjustment to interest costs on those foreign currency borrowings.
- The exchange differences arising on reporting of long term foreign currency monetary items at rates different from those at which they were initially recorded in so far as they relate to the acquisition of depreciable capital assets are shown by addition to/deduction from the cost of the assets as per exemption provided under IND AS 21 read with Ind AS 101.

8. Borrowing Cost:-

Borrowing costs specifically relating to the acquisition or construction of a qualifying asset that necessarily takes a substantial period of time to get ready for its intended use are capitalized as part of the cost of the asset. All other borrowing costs are charged to profit & loss account in the period in which it is incurred except loan processing fees which is recognized as per Effective Interest Rate method. Borrowing costs consist of interest and other costs that Company incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

9. Employee Benefits:-

Contribution to Provident fund/Pension fund:

Retirement benefits in the form of Provident fund / Pension Schemes are defined contribution schemes and the contributions are charged to the Profit & Loss Account in the year when the contributions to the respective funds become due. The Company has no obligation other than contribution payable to these funds.

Gratuity:

Gratuity liability is a defined benefit obligation and is provided for on the basis of an actuarial valuation made at the end of each financial year. Jaiprakash Associates Limited (JAL) (the holding company) has constituted a gratuity fund trust under the name 'Jaiprakash Associates Employees Gratuity Fund Trust' vide Trust Deed dated 30th March, 2009 for JAL and its subsidiaries and appointed SBI Life Insurance Co. Ltd. for the management of the trust funds for the benefit of employees. As a subsidiary of JAL, the Company is participating in the trust fund by contributing its liability accrued up to the close of each financial year to the trust fund. The difference between the actuarial valuation of gratuity for employees at the end of the reporting period and the balance of funds with trust is provided for as liability in the books.

Earned leave / compensatory absence:

Liability in respect of the earned leave including compensatory absence is estimated on the basis of an actuarial valuation performed by an independent actuary using the projected unit credit method.

Actuarial gains / losses arising from past experience and changes in actuarial assumptions are charged to statement of profit and loss in the year in which such gains or losses are determined.

Short-term employee benefits:

Expenses in respect of short-term benefits is recognized on the basis of the amount paid or payable for the period during which services are rendered by the employee.

Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding net interest), is reflected immediately in the balance sheet with a charge or credit recognized in other comprehensive income in the period in which they occur. Remeasurement recognized in other comprehensive income is reflected immediately in retained earnings and is not reclassified to statement of profit or loss. Past service cost is recognized in the statement of profit or loss in the period of a plan amendment.

While determining the past service cost at the time of plan amendment or curtailment, the amount of net defined benefit liability/asset is remeasured using the current value of plan assets and current actuarial assumptions which reflect the benefits offered under the plan and plan assets before and after the plan amendment, curtailment and settlement.

10. Tax Expenses:-

Income Tax expense comprises of current tax and deferred tax charge. Provision for current tax is made with reference to taxable income computed for the financial year for which the financial statements are prepared by applying the tax rates as applicable.

Current Tax:- Current Income tax relating to items recognized outside the profit and loss is recognized outside the profit and loss (either in other comprehensive income or in equity)

MAT:- Minimum Alternate Tax (MAT) paid in a year is charged to the Statement of Profit and Loss as current tax. The company recognizes MAT credit available as an asset only to the extent there is convincing evidence that the company will pay normal income tax during the specified period, i.e., the

period for which MAT Credit is allowed to be carried forward. In the year in which the Company recognizes MAT Credit as an asset in accordance with the Guidance Note on Accounting for Credit Available in respect of Minimum Alternate Tax under the Income Tax Act, 1961, the said asset is created by way of credit to the Statement of Profit and Loss and shown as "MAT Credit Entitlement." The Company reviews the "MAT Credit Entitlement" asset at each reporting date and writes down the asset to the extent the company does not have convincing evidence that it will pay normal tax during the sufficient period. MAT is recognized under Other Non-current Assets.

Deferred Tax:-Deferred tax is provided using the balance sheet approach on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purpose at reporting date. Deferred income tax assets and liabilities are measured using tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date and are expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect of changes in tax rates on deferred income tax assets and liabilities is recognized as income or expense in the period that includes the enactment or the substantive enactment date. A deferred income tax asset is recognized to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences and tax losses can be utilized.

The carrying amount of deferred tax assets is reviewed as at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will not be available against which deferred tax asset shall be utilized. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognized to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets are recognized for the unused tax credit to the extent that it is probable that taxable profits will be available against which the losses will be utilized. Significant management judgement is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and the level of future taxable profits.

The company identifies the tax consequence of an item whose tax treatment is uncertain. Tax treatment of an item is considered as uncertain when there is uncertainty whether the relevant taxation authority will accept the tax treatment of that item or not. If there is uncertainty over tax treatment of an item the company predicts the resolution of the uncertainty. If it is probable that the taxation authority will accept the tax treatment, there will be no impact on the amount of taxable profits/losses, tax bases, unused tax losses/credits and tax rates. In vice-versa case, the company shows the effect of the uncertainty for each uncertain tax treatment on amount of related items by using either the most likely outcome or the expected outcome of the uncertainty.

11. Leases:-

The Company (lessee) does treat all leases, except leases for short-term and leases of low value assets, as finance leases. The Company does recognize a right-of-use asset and a lease liability whenever it takes any asset on lease. The right-of-use asset is measured at cost that comprises of initial

value of lease liability, lease payments made on or before the commencement of lease, initial direct costs incurred by the Company and an initial estimated cost of dismantling & removing the leased asset and restoring the site on which the asset is located. The lease liability is measured at the present value of the lease payments due. The interest rate implicit in the lease or lessee's incremental borrowing is used to arrive at the present value. Subsequently, at each balance sheet date, the right-of-use asset is depreciated and lease liability is increased by interest amount & decreased by amount paid.

The Company (lessor) classify each of its leases as either an operating lease or a finance lease.

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset. A lease is classified as an operating lease if it does not transfer substantially all risks and rewards incidental to ownership of an underlying asset.

Under finance lease, at the commencement date, the Company does recognize assets held under a finance lease in its balance sheet and present them as a receivable at an amount equal to the net investment in the lease. The Company (lessor) use interest rate implicit in the lease to measure the net investment in the lease.

At the commencement date, the lease payments included in the measurement of the net investment in the lease comprise the fixed payments, variable lease payments that depend on an index or a rate, any residual value guarantees provided to the Company (lessor) by the lessee, the exercise price of a purchase option, payments of penalties for terminating the lease for the right to use the underlying asset during the lease term that are not received at the commencement date.

Under operating lease, the Company (lessor) does recognize lease payments from operating leases as income on a straight-line basis.

The Company (lessor) does apply Ind AS 36 to determine whether an underlying asset subject to an operating lease is impaired and to account for any impairment loss identified.

As a practical expedient, the Company is not required to reassess whether a contract is, or contains, a lease at the date of initial application.

Except as described below, the company (lessor) is required to make any adjustments on transition for leases in which it is a lessor and does account for those leases from the date of initial application except in the situation provided under Ind AS 116.

12. Fair Value Measurement:-

The Company measures financial instruments at fair value at each balance sheet date.

Fair value is the price that would be received on sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability or
- In the absence of a principal market, in the most advantageous market for the asset or liability

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by application of the highest and best use for the assets or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 : Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 : Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 : Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For the purpose of fair value disclosures, the Company has determined classes of assets & liabilities on the basis of the nature, characteristics and the risks of the asset or liability and the level of the fair value hierarchy as explained above.

13. Financial Instrument

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets include Trade receivable, loan to body corporate, loan to employees, security deposits and other eligible current and non-current assets

Financial liabilities include Loans, trade payable and eligible current and non-current liabilities

i. Transitional Provisions in opening balance sheet per Ind AS 101

The Company designates a previously recognized financial asset/financial liability as a financial asset/financial liability measured at fair value on the basis of the facts and circumstances that exist at the date of transition to Ind AS.

The Company designates an investment in an equity instrument other than investment in subsidiary, associates and Joint venture as at fair value through other comprehensive income on the basis of the facts and circumstances that exist at the date of transition to Ind AS.

The Company has assessed whether a financial asset meets the conditions w.r.t classification criteria on the basis of the facts and circumstances that exist at the date of transition to Ind AS, is practically feasible.

ii. Classification:-

The Company classifies financial assets as subsequently measured at amortized cost, fair value through other

comprehensive income or fair value through profit or loss on the basis of:

- the Company's business model for managing the financial assets and
- the contractual cash flow characteristics of the financial asset.

A financial asset is measured at amortized cost if both the following conditions are met:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and
- the contractual terms of the financial asset gives on specified dates, cash flows that are solely payments of principal and interest on the principal amount outstanding.

A financial asset is measured at fair value through other comprehensive income if both of the following conditions are met:

- the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A financial asset is measured at fair value through profit or loss unless it is measured at amortized cost or at fair value through other comprehensive income.

All financial liabilities are subsequently measured at amortized cost using the effective interest method or fair value through profit or loss.

The Financial instruments having prepayment feature with negative compensation are classified as measured at amortized cost, or measured at fair value through profit or loss, or measured at fair value through other comprehensive income if the respective conditions specified under Ind AS 109 are satisfied.

iii. Initial recognition and measurement:-

The company recognizes financial assets and financial liabilities when it becomes a party to the contractual provisions of the instrument. All financial assets and liabilities are recognized at fair value at initial recognition, plus or minus, any transaction cost that are directly attributable to the acquisition or issue of financial assets and financial liabilities that are not at fair value through profit or loss.

iv. Financial assets subsequent measurement:-

Financial assets subsequent measured is carried out at amortized cost, fair value through other comprehensive income (FVOCI) or fair value through profit or loss (FVTPL) as the case may be.

Financial liabilities as subsequent measured is carried out at amortized cost or fair value through profit or loss.

v. Effective interest method :-

The effective interest method is a method of calculating the amortized cost of a debt instrument and allocating interest

income over the relevant period. The effective interest rate is the rate that exactly discounts the estimated future cash payments or receipts through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Income is recognized on an effective interest basis for debt instruments other than those financial assets classified as, at FVTPL. Interest income is recognized in the statement of profit or loss and is included in the "Other income".

vi. Trade Receivables:-

Trade receivables are the contractual right to receive cash or other financial assets and are recognized initially at fair value. Subsequently they are measured at amortized cost (Initial fair value less expected credit loss). Expected credit loss is the difference between all contractual cash flows that are due to the company and all that the company expects to receive over the lifetime of a financial asset.

The company applies the simplified approach of IND AS 109, which requires measurement of loss allowance at an amount equal to lifetime expected credit losses. Lifetime expected credit losses are the expected credit losses that result from all possible default events over the expected life of a financial assets.

vii. Equity investments:-

All equity investments in scope of Ind AS 109 are measured at fair value other than investment in subsidiary, Associates and Joint venture. For all other equity instruments, the company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument by- instrument basis

viii. Cash and cash Equivalents:-

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

ix. Impairment of Financial Assets:-

The company recognizes loss allowance using the expected credit loss (ECL) model for the financial assets which are not fair valued through the statement of profit or loss. Loss allowance for trade receivables with no significant financing component is measured at an amount equal to lifetime expected credit loss (ECL). For all other financial assets, expected credit loss is measured at an amount equal to the 12-month ECL, unless there has been a significant increase in credit risk from initial recognition in which case those are measured at lifetime ECL. The amount of expected credit loss (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognized is recognized as an impairment gain or loss in the statement of profit or loss.

Impairment of non-financial assets:

At each reporting date, the company does assess whether there is any indication, that any asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the recoverable amount of the asset is estimated. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that

are largely independent of those from other assets. When the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount and the impairment loss is recognized in the statement of profit and loss.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessment of the time value of money and the risks specific to the assets.

If, at the reporting date there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount. Impairment losses previously recognized are accordingly reversed in the statement of profit and loss.

x. Financial liabilities:-

Financial liabilities are recognized initially at fair value less any directly attributable transaction costs. These are subsequently carried at amortized cost using the effective interest method or fair value through profit or loss. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts are approximate fair value due to the short maturity of these instruments

xi. Trade payables :-

Trade payables represent liabilities for goods and services provided to the Company prior to the end of financial year and which are unpaid. Trade payables are presented as current liabilities unless payment is not due within 12 months after the reporting period or not paid/payable within operating cycle. They are recognized initially at their fair value and subsequently measured at amortized cost using the effective interest method.

xii. Borrowings:-

Borrowings are initially recognized at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortized cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognized in the statement of profit or loss over the period of the borrowings using the effective interest method. Fees paid on the availment of loan facilities are recognized as transaction costs of the loan.

Borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period. Where there is a breach of a material provision of a long-term loan arrangement on or before the end of the reporting period with the effect that the liability becomes payable on demand on the reporting date, the company does not classify the liability as current, if the lender agreed, not to demand payment as a consequence of the breach, after the reporting period and before the approval of the financial statements for issue.

xiii. Equity Instruments:-

An equity instrument is any contract that evidences a residual interest in the assets of company after deducting all of its liabilities. Equity instruments are recognized at the proceeds received, net of direct issue costs.

xiv. Derecognition of financial instrument:-

The company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset

expire or it transfers the financial asset and the transfer qualifies for derecognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognized from the company's balance sheet when the obligation specified in the contract is discharged or cancelled or expires.

xv. Offsetting of financial instruments:-

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously. The Company does report separately both assets and liabilities, and income and expenses. Offsetting in the statement of profit and loss or balance sheet, except when offsetting reflects the substance of the transaction or other event, detracts from the ability of users both to understand the transactions, other events and conditions that have occurred and to assess the Company's future cash flows.

xvi. Financial guarantee

Financial guarantee contracts issued by the entities are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognized initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of IND AS 109 and the amount recognized less cumulative amortization. Since the company has been under CIR process financial guarantee contracts have not been recorded as liability in books.

14. Provisions, Contingent Liability and Contingent Assets:-

- i. A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

Contingent liabilities, if material, are disclosed by way of notes unless the possibility of an outflow of resources embodying the economic benefit is remote.

- ii. A provision is recognized, when company has a present obligation (legal or constructive) as a result of past events and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, in respect of which a reliable estimate can be made for the amount of obligation. The expense relating to the provision is presented in the Statement of Profit and Loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the

provision due to the passage of time is recognized as a finance cost.

iii. Onerous contract

The Company does recognize and measure as a provision the present obligation under an onerous contract, an onerous contract being a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it.

iv. Contingent Asset

Contingent assets are not recognized but the related asset is disclosed when inflow of economic benefits is probable.

15. Earnings Per Share:-

Basic Earnings per share is computed by dividing the net profit or loss for the year attributable to equity shareholders (after deducting preference dividends) after tax by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the year is adjusted for events of bonus issue and buy back. For the purpose of calculating Diluted earnings per share, the net profit for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effect of all dilutive potential equity shares.

16. Statement of Cash Flows:-

Cash Flows are reported using the indirect method, whereby profit after tax is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of future or past operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows are segregated into operating, investing and financing activities.

17. Segment Reporting:-

The Company comprise of only one segment i.e. Yamuna Expressway Project, an integrated and indivisible project which inter-alia includes construction, operation and maintenance of Yamuna Expressway and rights for land development of 25 million sq.mtr. along the Expressway. Accordingly, the same is treated as a single cash generating unit for the purpose of impairment testing

18. Revenue:-

The terms of the Concession Agreement with Yamuna Expressway Industrial Development Authority (YEIDA) provides for development, operation and maintenance of the six – lane access controlled expressway along with service road and associated structures etc. between Greater Noida and Agra and development of 25 million Sq.mtr. of land at five locations along the expressway. The revenues are derived from toll fee of expressway, road side facilities and real estate sales including transfer of constructed properties and transfer of developed and undeveloped land leased as concession under the said Concession Agreement.

- (i) The revenue therefrom is recognized as under:
 - (a) The Revenue from Expressway is recognized based on toll fee collected.
 - (b) The Revenue from road side facilities is recognized

(c) Revenue from Real estate projects:

Revenue from sale / sub-lease of developed land / plot and FSI rights is recognized based on the "Satisfaction of performance obligation at a point in time method", as per terms agreed per agreement to sell / sub lease and offer of possession and all significant risks and rewards are vested in the customer", provided where no significant uncertainty exists regarding the amount of consideration that will be derived from such sales and it is not unreasonable to expect ultimate collection.

(ii) Revenue from healthcare services:

Hospital services include charges for accommodation, medical professional services, equipment, radiology, laboratory and pharmaceutical goods used in treatments given to patients.

Contracts with customers could include promises to transfer multiple services/ products to a customer. The Company assesses the product/ services promised in a contract and identifies distinct performance obligation

in the contract. Revenue for each distinct performance obligation is measured to at an amount that reflects the consideration which the Company expects to receive in exchange for those products or services and is net of tax collected from customers and remitted to government authorities such as sales tax, excise duty, value added tax and applicable discounts and allowances including claims. Further, the Company also determines whether the performance obligation is satisfied at a point in time or over a period of time. These judgments and estimations are based on various factors including contractual terms and historical experience.
